Skills

- HTML5 | CSS | JavaScript | TypeScript | React | Nextjs | Redux | RTK | RTK Query
- Git | Jest | Unit Testing | Tailwind CSS | Material UI
- Frontend | English, Telugu, Hindi – *All professional proficiency or above*

Experience

Frontend Engineer   **Kofuku Idealabs**   *Hyderabad, INDIA*   **02/2023 - Present**

Unerth:

- Updated the Unearth enterprise search app by developing important features. Made it simple to upload files and use platforms like Google Drive, OneDrive, Teams, Outlook, and Gmail. Integrated user accounts for a smoother search experience. As a Frontend Engineer, I built the entire search function, providing comprehensive results from various user integrations.
- Added a smart chat feature using AI, allowing users to have easy conversations and get key information from files without reading a lot.
- Created and put into action the Knowledge Bank feature, allowing users to personalize online resources. Users can save and manage links on specific topics, adjusting how often they get updates for the latest information. This improvement makes time management much better.
- Enriched user engagement by implementing a chat feature, allowing users to interact directly with personalized online resources. Leveraged **Next.js**, **React**, **RTK**, **RTK Query**, and **SCSS** modules to ensure a robust and user-friendly application.

Case Management:

- Transformed law enforcement record-keeping with a comprehensive application that tackles the ongoing challenge of storing case records. Implemented key features like case creation, FIR filing, secure document storage, and robust data management for stations and officers within each station. The application smoothly manages end-to-end information flow, covering case allocation, assigned officer tracking, and progress monitoring.
- Ensured the reliability and functionality of the application by developing rigorous unit test cases. Leveraged the latest technologies, including **Next.js**, **React**, **RTK**, and **RTK Query**, to create a cutting-edge solution that meets the specific needs of the police department.

Education

Masters in Development   **Azim Premji University**   *Bengaluru, INDIA*   **07/2019 - 09/2021**

Projects

- **Multi Todo App:** *React, TypeScript, Tailwind CSS*   **(08/2022)**
  - This application works with multiple to-do lists, and each to-do list maintains its individual tasks.
  - LiveDemo : Click here to see the demo
  - Github repo : Click here to check out repo

- **Invoice Generator app :** *React, React-hook-form, Material UI*   **(04/2022)**
  - An invoice generator application that creates dynamic invoices.
  - Live Demo : Click here to see the demo
  - Github repo : Click here to check out repo
